Like so:

```
Traceback (most recent call last):
  File "discover.py", line 18, in <module>
    asyncio.run(asyncio.gather(read_and_print(aioserial_instance),
aioserial_instance.write_async(b'Hello, World!\n')))
  File "/Users/up/anaconda3/envs/winch/lib/python3.8/asyncio/runners.py", line 37, in run
    raise ValueError("a coroutine was expected, got {!r}".format(main))
ValueError: a coroutine was expected, got <_GatheringFuture pending>
```

Python 3.8

😊

🖼 **eling22** commented on 27 Oct 2020

you can turn:

```
 asyncio.run(asyncio.gather(read_and_print(aioserial_instance), aioserial_instance.write_async(b'Hello,
World!\n')))
```

to

```
  async def tasks(aioserial_instance: aioserial.AioSerial):
      await asyncio.gather(read_and_print(aioserial_instance),
  aioserial_instance.write_async(b'Hello, World!\n'))
```

☺
